

High-security doors for
modular vault rooms

Centurion Vault Door

BURGLARY-RESISTANT PROTECTION

Key Features

- Every grade of Centurion vault door has been independently tested by ECB•S and awarded the EN 1143-1 certification for burglary resistance.
- The doors are designed for integration with Centurion vault room panels and constructed to the same standards.
- The vault doors have undergone additional testing for resistance to explosives and grades IX-XII also resist attack from diamond core drill bits.
- The door frame is armoured to provide extra protection.
- Locking options include one key lock and combination lock as standard and a high-security electronic lock as an option.
- Centurion vault doors can be fitted with a grille gate providing added security for the main door. The grille gate is accessed via a high-security lock and can be opened manually or automatically.
- The door is designed to accommodate an alarm system.

Product Specifications

	Thickness (mm)	Weight (kg)	No. of bolts	Clearance	
				Height	Width
Grade V (EX)	290	1 700	6	1970	900
Grade VI (EX)	290	1 700	6	1970	900
Grade VII (EX)	290	1 700	6	1970	900
Grade VIII (EX)	290	1 700	6	1970	900
Grade IX (EX) (CD)	290	1 700	6	1970	900
Grade X (EX) (CD)	415	3 000	6	1970	900
Grade XI (EX) (CD)	415	3 000	6	1970	900
Grade XII (EX) (CD)	415	3 000	10	1970	900

EX denotes protection against explosives.

CD denotes protection against diamond core drill bits.

Testing

Every grade of Centurion vault door has been independently tested by ECB•S and certified in accordance with EN 1143-1, the European standard for burglary protection.

This standard covers attacks from a variety of tools, including crowbars, high-powered disc cutters and oxyacetylene torches.

Centurion vault doors also provide certified protection against explosives (EX classification) and grades IX-XII have been tested to provide resistance against powerful diamond core drill bits (CD classification).

Lock Options

Grades V-IX are fitted with two standard locks – one key lock and one combination lock – whilst grades X-XII have an additional combination lock as standard. The locks have been designed to match the security levels required by the vault doors.

As an option, Centurion vault doors can be equipped with a high-security electronic lock offering extra functionality such as a time-lock, protected code-entry, a silent alarm and multiple user management.
